

Produkt Design: MAINZ DESIGN

dentaZOOM®

OP-Mikroskope

dentaZOOM - the flexible alternative to bulky surgical microscopes.

The compact monocular surgical microscope dentaZOOM increases the level of quality in minimally invasive and conservative dental treatment.

- Light emission: An integrated ring light with 4 high performing LEDs guarantee a shadowless light emission.
- Magnification: 10-times magnification provides an optimal sight to the apex
- Work Flow: dentaZOOM can be implemented immediately into the work flow of dental treatment.
- Award: dentaZOOM won the 2011 Dental Innovation Award.
